

# Irma Elks' Barbecue and Picnic at North Irma Community Hall July 8

## CARENA NEWSPAPER CAR BINGO NUMBERS

B	I	N	G	O
7	28	36	51	74
2	24	44	55	67
10	30	34	58	63
4	20	31	57	64
11	21	33	54	71
12	18	43	48	73
6	19	38	49	62
8	17	32	59	
15	25	41	50	
	27	42	46	70
			60	

Only two numbers drawn in the future each Saturday night until car is won. New numbers this week are N41 and N42.

Watch this paper for further draws.

## Notice to Creditors And Claimants

IN THE ESTATE OF ELMER JONES, late of the Settlement of Irma, in the Province of Alberta, Farmer, Deceased.

NOTICE IS HEREBY GIVEN that all persons having claims upon the Estate of the above named Elmer Jones, who died on the 18th day of April, A.D. 1956, are required to file with Mrs. Violet Jones of Irma, Alberta, Executrix of the said Estate by the 15th day of August, A.D. 1956, a full statement, duly verified, of their claims and of any securities held by them and that after that date the Executrix will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed or which have been brought to her knowledge.

DATED this 19th day of June, A.D. 1956.

J. A. MacKenzie,

Wainwright, Alberta.

Solicitor for the Executrix.  
29-8-13c

## Southern Sayings

Born to Mr. and Mrs. E. R. Jackson, the former Lorna Archibald, at the Hardisty hospital on Saturday, June 30, a son, wt. 8 lbs. 4 oz.

Mrs. A. Cairns and Lily are attending a church convention at Greenshields.

Mr. Harry Long attended a Hereford Cattle sale at Camrose recently.

The Frank Slide, which took place in 1903 and claimed 26 lives, buried the Alberta coal-mining town under 70 million tons of rock.

## Weekly Inspirational Corner

(Sponsored by an Irma Times reader)

Let this mind be in you, which was also in Christ Jesus.  
Who, being in the form of God, thought it not robbery to be equal with God: But made Himself of no reputation, and took upon Him the form of a servant, and was made in the likeness of men: And being found in fashion as a man, He humbled Himself, and became obedient unto death, even the death of the cross.

Wherefore God also hath highly exalted Him, and given Him a name which is above every name:  
That at the name of Jesus every knee should bow, of things in heaven, and things in earth, and things under the earth:

And that every tongue should confess that Jesus Christ is Lord, to the glory of God the Father.  
PHIL. 2:5-11.

## WITH THE District Agriculturist

By J. S. Duncan

**Hay Time**  
Hay crops are short this year so it is important to get the hay up in the best possible condition. To keep quality as high as possible do not cut too much ahead of the rake and stack or bale as hay bleaches badly when cut and is lying Ral. the hay while it is still a little tough as this prevents loss of leaves.

Stack the hay or bale it as soon as it is dry. If it is baled, pick up and stack the bales as soon as possible to prevent possible rain damage. If you are putting up silage remember that proper packing is one of the most important points about good silage.

**Hogs**  
Crop prospects are better now and if looks as if they will be gain this fall. Hogs still give profitable returns from barley and oats. Don't forget that high grading pigs give a much greater profit than "C" grade. Use only good bacon type breeding stock and market at the correct weight to get best returns.

**Watch Those Trees**  
While it is easy to control insects that damage shelterbelt trees you have to see them to know when to apply control measures. Aphids, Sawfly, etc. can be controlled easily with DDT, Chlordane, Malathion, Lindane and other insecticides. If there is any sign of Spider Mites then Malathion is one of the best to use.

**Weed Control**  
Don't let weeds get too far advanced if you decide to spray. They kill easiest when small. If you don't have many resistant weeds on it you can use 2,4-D to keep your summer-fallow clean for a while. It is quicker and possible cheaper than working it.

All roads lead to Viking on July 16 when Cliff McKay and His Holiday Ranch Jambores will be at the Carena.

## News Items From Kinsella & District

The officers of the OORP were installed into their various offices for the coming year on Tuesday, the 26th: District Deputy Supreme Honored Royal Lady Scott officiated at the installation assisted by Past Honored Royal Lady Cavanaugh, both of Hardisty. Lady O. Murray of Irma was pianist for the evening. Past Honored Royal Lady M. Lancaster and Lady I. McNeil received at their office. Honored Royal Lady G. M. Murray received a corsage of red roses.

At the recent annual Community League meeting the following officers were elected: President, Mr. E. C. Carpenter; Vice-president, Bill Armitage; Secretary, Mr. H. Carter.

The pupils of the Kinsella school held a picnic before school closed for the summer holidays.

Mrs. J. Lancaster and Mrs. M. Fessenden attended the church camp meetings at Greenshields. The members of the W.L. wish to thank all those who helped in any way at the clean-up day at the cemetery.

Kinsella school students who are working at the Wainwright Military Camp include Marilyn Horinek, Virgil Lygaard and Bruce McGregor.

Mr. and Mrs. Gordon Sagen and family of Edmonton were visitors at the home of Mrs. Sagen's brother and sister-in-law, Mr. and Mrs. J. W. Wilkins, during the week-end.

Mr. and Mrs. A. Barker and family were week-end guests at the home of Mr. Barker's sister and brother-in-law at Elk Point. Mrs. R. Stevens spent the week-end with her son and daughter-in-law Mr. and Mrs. J. Stevens of Sedgewick.

The W.A. will meet on Thursday the 5th at the home of Mrs.

## Northern Nuggets

Congratulations to Mr. and Mrs. L. Hunter on the birth of a son at the Mannville hospital, on July 2.

Mrs. Dick Gower arrived on Saturday from Calgary to spend a few days with her mother, Mrs. E. J. Jones, Edith is on her way to join her husband in Toronto, where they will make their home. Our best wishes go with her.

Mr. Bob Johnson, Mr. and Mrs. Edgar Jones, Mr. and Mrs. Lambert, Mr. B. Prior and Mr. E. Larson are among the number of farmers and their wives who are assisting at the army camp.

Mr. and Mrs. A. J. Pierce of Victoria, enjoyed a visit last week with his son and family, Mr. and Mrs. Art Pierce.

Mr. and Mrs. J. Clidell, Bert and Jack, attended the Dick McMan wedding in Chauvin on the 28th of June. Due to unusually heavy rains, they encountered such bad roads in that area that they were practically marooned until Saturday afternoon, when, with the assistance of a tractor, they managed to get out.

Mr. Cole from the coast, an old-timer of the Irma district, is visiting at the home of his daughter, Mrs. G. Coulman. Relatives from Edmonton also arrived for a very happy family reunion on June 29. Mr. Cole's 80th birthday.

Mr. and Mrs. P. Keller have returned from a two weeks trip through southern Alberta.

Mr. Erle Prior attended the Grand Masonic Lodge in Edmonton. Last week Mr. Murray Hamilton, Mrs. Prior's brother, was a visitor at the Masonic Lodge in Irma.

Mrs. P. Prosser returned to Edmonton for a few days with her niece Miss Elmer Myers who has been visiting here. We wish Elmer Elmer is making plans for a trip to Europe.

Mr. Bill Guy had the misfortune of fracturing his leg while working north of Meadow Lake. However, he is wearing a cast, so we hope he will be able to get around and enjoy his month's convalescence.

Miss Carol Lambert is working in Wainwright.

## EASTERLY ECHOES

About seventy-five friends and neighbors gathered together at the home of Mrs. Sunday afternoon to say farewell to our friends and neighbors who have a general store at Flaxcombe, Sask. The sunny afternoon was enjoyed by all the young folks paying ball, given a hand by Bill Dootson getting in the occasional home run and not being able to find third base. This game being umpired by Bob Dempsey. The ladies enjoyed Carolyn Morse playing the accordion with Harold Dootson singing, while across the grass the men played horse-shoes with the occasional remark floating by: "Well, what do you know, he made a ringer!"

A picnic was laid out despite a dark gathering cloud but all enjoyed this shared feast after which Mr. J. Jackson came forward and presented Lilly and Harold, as they are known to us all, with a Venetian Copper Tea Service, expressing regrets that we were losing our friends and neighbors, remarking this was just another milestone in their lives.

From the Battle River, W.L. Mrs. E. Fenton presented Lilly with a pearl pin, saying how we would miss her for his splendid ideas she always gave us. Harold, a little overwhelmed by it all, thanked everyone and said there was no way of saying how they appreciated this gesture of their neighbors and friends and that they would be back from time to time but to be sure to visit them at their home. After all joined hands and sang "For They Are Jolly Good Fellows" and personal farewells were given, we continued our way home with another milestone to remember.

Mrs. Bill Walker is visiting relatives and friends at Mannville for a few days. Mrs. Eldon Fenton spent last week at Wainwright visiting with her daughter Sylvia (Mrs. Robt. Shaw) and new granddaughter Marilee.

Mr. and Mrs. Nels Solberg of Herbert, Sask., are visiting at the home of the former's sister, Mrs. Bill Veer.

Miss Mary Dootson was home for the week-end.

Mr. and Mrs. Stuart Fenton attended the Northern Alberta Hereford Tour.

Mr. and Mrs. Gidora of New Westminster stayed for two days visit with their daughter, Mrs. Jack Svard. The Gidora's are enroute to the Ukrainian Festival at Winnipeg. Something they've wished to attend for quite a few years.

It's nice to see the sun shine as it is really needed after our abundant supply of moisture.

## BETTY JEAN FERGUSON

Toronto columnist Alex Baris heads a new CBC Television variety show, "The Baris Beat" every week. Handling the vocal chores is Betty Jean Ferguson, the lovely former Miss Canada. The orchestra is under the direction of pianist Bill Iabister.

Canadian factories produce about 350,000 hockey pucks a year.

## Glen-Coa Gleanings

Mr. Wm. Pedel and his daughter Margaret have been on vacation these past two weeks at Chilliwack.

Mrs. N. Fluevog left last Sunday evening by train to visit her sister Mrs. T. Lyse and family at Davenport, Iowa.

Messrs. P. Spring, H. Fuder and Merle Knudson are now at Boulder, Montana, having left by car for that destination last Sunday.

Mr. and Mrs. Goodnick of Spokane made a surprise visit to the Springs last week.

Miss Evelyn Erickson had a few days at home last week.

Mrs. Lloyd Erickson and children of Edmonton visited at the Erickson farm, the first part of this week.

Mr. and Mrs. Don MacKay and children spent the holiday week-end at Withalls. Mrs. S. Berg and children came with them from Gwynne also.

Mr. and Mrs. Clayton and family of Edmonton were holiday guests of Mr. and Mrs. Geo. Pedel.

Mr. Oren Spring has part of his holidays now which he is spending at home.

July 2 saw some of our community going to Mannville, while others went in the opposite direction to Sedgewick.

## Jarrow News

Mr. and Mrs. E. Skori and Leonard have gone to Fernie, B.C., to visit with Mrs. Skori's parents, Mr. and Mrs. Arrow-smith.

Word has been received of the death of one of the early settlers in the district, Mr. Ed Peet. Mr. and Mrs. Peet left the Jarrow district several years ago and have resided in Edmonton since. Sympathy is expressed to Mrs. Peet and family.

Mr. and Mrs. Henry Triche and family of Edmonton spent the long week-end with Mrs. Triche Sr.

A donation toward the Jarrow Church Memorial Fund in memory of Mrs. M. Chase has been received from Mr. and Mrs. A. Overby.

Mr. and Mrs. Leo Mark are spending the holiday week-end with Mr. and Mrs. E. Bruhaug and Mr. and Mrs. W. R. McKins.

Miss Evelyn Gay of Oshawa, Ont., is visiting at the manse with her nephew, Mr. Robert Gay.

The Batt Sports although partly rained out, proved to be quite a success in spite of muddy roads and what have you. The W.A. and community wish to thank all who contributed and helped out so generously in many ways. Rumor has it that when road conditions are improved there may be another sports day.

Mr. and Mrs. Bert Yakes of Chilliwack, B.C., are visiting their daughter, Mrs. Harold Barker and son William.

Mr. and Mrs. Lawrence Overbo were week-end guests at the home of Mr. and Mrs. A. Overby.

Mrs. A. Hardy of Jarvie visited with her sister and family, Mr. and Mrs. P. Wright during the week-end.

Mr. Harry Meakins and grandson Gordon White are on a two week holiday trip to the coast where Harry will visit with his sisters who reside there.

Mack and Bill, both accompanied by Maryanne Brown and Verla Prior spent Dominion Day at Fish Lake. Here's hoping they bring back lots of fish.

## Kinsella Elks Sports July 18th

The Kinsella Elks Lodge have set the date for their Sports Day. It's Wednesday, July 18. Keep this date in mind.

## CHURCH SERVICES

**ST. MARY'S CHURCH NOTES**  
Service of Evensong will be held in St. Mary's Church on July 8 at 2 p.m.

**SHARON LUTHERAN**  
Sunday, July 8  
Sunday School and Bible Class 2 p.m.  
Divine Worship 3 p.m.  
L. Knudson, Pastor.

## Card of Thanks

I wish to thank all my friends for cards, fruit, chocolate, letters and visits, the Alliance church and the Irma band for their kindness and all those who showed their concern by helping out in a financial way. Thank you each one.—Leo Shaw.

Saturday Evening Post serial  
... their romance started on a rainy street and flourished  
forever despite war or death.  
(Family Picture)

## The weak and timid often strongest in times of crisis

In times of crisis it is often the weak, timid little man who rises to the occasion and surprises everyone by revealing unsuspected courage and a cool head, while the tough he-man is just as likely to give way to panic.

### TRY AND STOP ME!

By KENNETH OSEB

Battling Mike Flaherty had taken an awful beating through fifteen gruelling rounds, but at the finish the sports announcer insisted in dragging him up to the microphone. "Say anything," he ordered. "Your ma will be happy to know you're still alive!" The poor fighter staggered, held tight to the mike, and muttered, "Hello, who's calling?"

Two old college mates met after several years. One said glumly, "I've a tough row to hoe, Jim. My wife's always trying to keep up with the Joneses."

"You're lucky," snapped the other. "Mine's trying to keep up with the Rockefeller's."

The pastor of a church in a small town was loved and respected by his congregation but his salary was necessarily small, so when a prosperous congregation in a large city offered him double the fee to shift his allegiance, the local church could not possibly match the offer.

"I suppose," mourned a member of the flock to the preacher's son, "your father will accept the call to that big city."

"Dunno," admitted the boy. "Dad's on his knees in the study at this very moment praying for guidance."

"And your ma?"

"She's upstairs packing the trunks."

A high school band in Wisconsin had prepared to spell out "HELLO" to a visiting dignitary. But when half-time came and the band marched onto the field, the "O" formation lost directions, and stood in front of the other four.

### Good nutrition

Good nutrition is a means to good health. A balanced diet helps to build up resistance to disease. To keep healthy, meals should contain a variety of foods to provide the necessary amounts of protein, minerals and vitamins that make up an adequate diet. Canada's Food Books outline a basic diet for children and adults.

### THREE PARTS

Studies of Greenland indicate that the island may be divided into at least three parts by canyons scraped out below sea level by glaciers. 3201

### How to Reduce Swollen

### Painful Piles

Here is a nice, clean, easy way to get relief from the most distressing of swollen, painful piles without the inconvenience of ointments, sitz baths or suppositories.

The secret is in taking just one small Mann-Rod Tablet, with water, two or three times a day. Works almost instantaneously. Internally, it softens and cleanses the bowels, relieves itching, soreness and pain. Helps shrink piles and permits them to heal.

Why suffer needlessly when Mann-Rod offers you so much? Get a package today. See for yourself how nice this little, how much more comfortable it will be than all those drug store, low cost, money-wasting if you are not 100% pleased.

THE FANTASY EVENT AT HAIR DISPLAY — The German Hairdressers' Show was held recently at Frankfurt, Germany, and one part of the show was the open-style—or fantasy event. The hairdressers were given a free hand to do any styles they desired. The style on the young woman above was judged the winner by the crowd. It was nicknamed "Frog King".

## Thousands die annually in drownings

TORONTO. — "It is almost easier to tell that summer has come to Canada once more by looking at the headlines in newspapers reporting the latest drowning victims, than by noticing the new leaves on the trees," says Dr. Gordon Bates, General Director of the Health League of Canada.

"More than a thousand Canadians lose their lives every year through drownings, and attention at this time should be called, not only to the conventional rules of safety which should be observed, especially by swimmers and vacationers, but also to the all-important matter of artificial respiration."

"It is more than 16 years since Health Magazine first called attention to many serious misconceptions which arose in connection with the problem of drowning and artificial respiration," he says. "There has been a general and mistaken opinion that if a person is under water for more than four or five minutes, artificial respiration is useless. This is incorrect. There are numerous instances of persons having been revived even after being submerged for as long as half an hour."

"Another misconception has to do with signs of death. In drowning cases the ordinary signs of death do not count. Victims of drowning accidents have been revived in spite of the fact that for comparatively long periods, they have appeared to be dead. For perhaps several hours the victim has no pulse, no detectable heart beat, and no eye reflex. These are the ordinary accepted signs of death."

"Rules laid down by the Artificial Respiration Committee of the Health League of Canada 16 years ago were that artificial respiration must be continued for a minimum of four hours, or until rigor mortis sets in. Attention to these rules may save numerous lives this summer," Dr. Bates concluded.

### VALUABLE LEAVES

If the outer leaves of lettuce and cabbage are thrown out, valuable vitamins and minerals are lost. These leaves can be used in soups or shredded for salads. Beet tops make an excellent substitute for other greens.

### IGSAW GRILLEWORK

Cut from pine for doors, windows gates and fences

Usually when we think of grillework it is the lacy designs in iron to be seen on houses of the last century. The work shown in the sketch is not iron but was sawed from pine. The repeats traced from a pattern are only 12 inches long and six wide. Note

that two of these end to end are repeated in the balustrade and six on the column face. The valance repeats around the porch. The pattern used for this job shows the design on doors, windows, gates and fences. The pattern carries the design in actual size for tracing onto the wood, with detailed directions. Pattern number is 396 and copy will be mailed for 35c. It is included in the Home Improvement Packet of five patterns for \$1.50.

FREE CATALOGUE upon request

Address order to: Home Workshop Patterns, Department F.P.L., 443 West 5th Avenue, Vancouver, B.C.

### Fashion news

#### From Britain

Stoles and scarves have become, in the last 15 months, items of high fashion and popularity. United Kingdom manufacturers have produced them in a wide range of designs and materials as was seen at the recent Handkerchiefs and Scarves Trade Fair.

Mohair scarves and stoles created by a Scottish firm are made in a variety of 56 different shades and colors. Utilitarian, as well as beautiful, they are in demand in many countries. In fact the firm exports 80 percent of its production—and the production has increased by 500 percent in two years.

An unusual head square was introduced by a London firm. Called the Lamora, it is in water-repellent wool and is designed to be worn over the head when the weather is too rough for a hat. The Lamora is no mere piece of waterproof material; it is a head scarf with full color interest.

WHERE'D IT GO?—In a baseball game between hometown Boston Red Sox and visiting Detroit, a hard grounder to third suddenly disappeared as Red Sox third baseman Billy Kinnear went to find it. As he desperately tried to find it, Tiger hitter Bill Tuttle reached first safely. The ball was finally located in Klaus' jersey, above, thus ending the suspense.

## The Pattern Shop

### Fashions

Back interest!

4512 14 1/2-24 1/2

by Anne Adams

Wonderfully flattering style for Half-Sizers—cut to fit the shorter, fuller figure perfectly! Note the newy back interests—in cape-like shoulder yoke, soft gathers at the waistline. Sew-pretty in cotton, crepe, faille—with your favorite scallop trim! Sew-easy too!

Pattern 4512: Half Sizes 14 1/2, 16 1/2, 18 1/2, 20 1/2, 22 1/2, 24 1/2. Size 16 1/2 requires 3 1/2 yards 35-inch. This pattern easy to use, simple to sew, is tested for fit. Has complete illustrated instructions.

Send thirty-five cents (35c) in coins (stamps cannot be accepted) for this pattern. Write plainly Size, Name, Address and Style Number and send orders to: Anne Adams Pattern Dept., Department F.P.L., 68 Front Street W., Toronto.

Be sure to write plainly your Name, Address and Pattern Number.

### MATERNITY TOP

Look neat, smart and pretty all summer

Household Arts Department, Department F.P.L., 68 Front Street W., Toronto.

Two FREE patterns—printed in the new Alice Brooks Needlecraft book for 1956! Stunning designs for yourself, for your home—just for you, our readers! Dozen of other designs to order—all easy, fascinating handwork! Send 25 cents for your copy of this wonderful book right away!

## Tracing origin of Japanese seen as difficult task for researchers

Freud from the theory that the emperor is divine, Japanese scholars are trying to find out about their origins, says story by Brian Kennedy of Reuters News Agency.

Japanese scholars are agreed that few problems present greater difficulties to anthropologists than tracing the origin of the Japanese people. Surviving records lack historical accuracy. Archaeological research has been slight.

Before the war, Japanese scholars were unable to publish their findings, because no one dared to throw doubt upon the divine origin of the emperor. After Japan's defeat, however, the emperor publicly renounced descent from the gods, and anthropologists here have now started to publish their theories.

Scientists apart, any rough-and-ready observer in any Japanese street will find plenty of types which would appear at home in the Mediterranean, the Arab countries, Malaysia or the Philippines, Mongolia, or the Tuamotu islands. Many Japanese have a Polynesian cast of countenance. Many are clearly of the Mongol type.

Dr. Masao Oka, professor of social anthropology at Tokyo University, notes two easily distinguishable main types in Japan, the plebeian and the patrician.

The "plebeians," he says, have dark skin, high cheek bones, and heavily-boned physique. The "patricians" are more finely built, often

By Les Carroll

### THE TILLERS

## OUR COMPLETE SHORT STORY—

## the pursued

—By JOHN L. CHAVE

THE STREET was poorly lit, but here and there a street-lamp sparkled in the rain, half-way to the party at the Randolph's, Marie Wilkins saw the headlights of a car coming slowly behind her. I wonder, she asked herself, could that be Ed? Perhaps he had returned and had come after her, was trying to find her on the way. He was going to be kind about her storming out of the house after their foolish quarrel at the dinner-table. She must have hurt him deeply when she had said "All right, Ed, if you won't come to the Randolph's with me tonight, I'll go to the party myself, even if I have to walk!" She had flashed her head over at him. "And Jim Fowler will see that I get home—if I do come back."

Now she felt remorseful, walking alone through the rain, utterly miserable.

Her good coat seemed now quite as bedraggled as her hair. Her nose, she thought, needed a touch of powder, and her eyes smudged with tears that the scattered raindrops only partly concealed.

Marie looked back over her shoulder, and saw to her disappointment that she did not recognize the car. It seemed to be following her, so she began to walk more quickly.

Alarming thoughts raced through her head as she remembered how the papers were full of stories about purse-snatching and worse. It had been anger rather than courage that had led her out on such a night. She clutched her purse and drew her coat more tightly around her. She still had a long block to go.

Even when she quickened her pace the car kept ahead, beside her, its headlights shining like a torch on the wet pavement. Suddenly she was furious that Ed had allowed her to go out in the rain when taxis were just not to be had. She had always been impetuous, and in the unreasonable

bitterness of this, their first quarrel neither had taken time to think.

The hood of the car was level with her nose. She was afraid to look into the car. "I must not run!" she repeated to herself. "Perhaps they will drive on. I'll just go along and mind my own business. But I do wish I'd worn my old coat!"

The car stopped and three tall men jumped out. In a panic, Marie ran up the steps of the nearest house and pounded on the front door. She could see through to the kitchen. A fat woman with gray hair was coming slowly towards the door, smoothing her dress, patting her hair. The woman stopped to close a closet door and stooped down to pick up a newspaper from the floor.

"Oh, hurry!" called out Marie, frantically, "hurry, please!" The three men ran up the steps behind her.

"What do you want?" asked one of the men. "Who are you looking for?"

"Anything we can do for you?" asked another as he took out his latch-key and opened the door just as the woman reached it.

"Oh," exclaimed Marie, "Oh, my goodness! You live here!"

"Who's this Frank?" asked the gray-haired woman. "I thought it was a stag-party you're having tonight."

"I don't know who it is, Mother," said the man she called Frank. "Never saw her before."

"Oh, I must have the wrong number," said Marie. "I've made a mistake." She was trembling as she backed away, frightened and embarrassed. "I must be on my way."

She started down the steps. The woman with the gray hair had a cup of tea with us," she invited. "The kettle's on, and it will just take a minute." She looked down the street. "You must be soaked in this rain."

"Well, thank you," said Marie. The woman poured the tea and set out cups in the kitchen. "My dear, having a few friends in for cards," she said. The cup was not very steady in Marie's hand, but the warm, sweet tea revived her spirits.

"You seem frightened, my dear," said the woman. "Frank can drive you home."

"I thought I was being followed," admitted Marie, but I couldn't impose on you further."

"I don't like to see you start out again alone, my dear," said the woman. Her gray eyes were kind. She eyed the ring on Marie's finger. "Would you like to telephone from here? I doubt if you find a taxi on a night like this, but perhaps your husband—"

"Yes, I would like to phone," interrupted Marie. "I was just on my way to a party a couple of blocks from here."

As she sat down at the telephone in the hall she thought of how she had been about to phone Jim Fowler before she left the house, knowing he would have been glad to drive over and pick her up. She could have used some of his sympathy after her words with Ed! After a moment she began to dial a number. Outside the rain was still splashing on the pane.

Then, impulsively, she put her hand down on the instrument and dialed a different number. She had to let the phone ring for several seconds. Her face lit up as someone answered.

"Hello, my Darling," she said. "Please, can you come for me? No, I'm fine." She turned to the woman for the address and gave it on the phone. "Thanks, Dearest," she said. "Yes, I'll wait here for you." She was smiling as she hung up.

A few minutes later a car drove up in front of the house and a man in a raincoat and a brown hat came up to the door. Marie went out on the porch to meet him.

The gray-haired woman followed her. "Thank you so much," Marie said to her. "I don't know your name, but I would like you to meet my husband, Ed Wilkins."

"I'm Mrs. Hubby," said the woman. "I'm glad I was able to help you. Sorry you had such an experience."

"It wasn't so bad," said Marie. "I'll never forget this evening—never." She held tightly to Ed's arm as they walked to the car.

## Cow 'psychiatry' prevents upsets

Cows can be just as temperamental as humans about accepting new members into an established group, according to a recent issue of the American Agricultural Research.

Cow "psychiatry" studies have shown that a new animal turned into a herd without proper introduction may get a "cool" reception as exhibited in butting, kicking, biting and general antagonism.

The problem is more than academic in that it can and does affect milk production if the herd becomes "upset".

## Kennebec good chipping potato

Potatoes used for chips or crisps must have certain characteristics which not all varieties possess. First, the potatoes must be of low moisture content so that when fried there is relatively little water to draw off. The less water there is, the crispier and less oily the resultant chip. A second requirement is low reducing content. Varieties differ in original sugar content and also in the rate at which sugar is formed in storage and in the rate at which the concentration can be subsequently reduced by conditioning at 70 to 80 degrees before use.

Of the varieties tested at the Canada Department of Agriculture Experimental Farm, Kentville, N.S., the variety Kennebec has been found to meet these requirements very satisfactory says G. W. Hope, food technologist. This potato, when mature, is of high enough specific gravity or dry matter content to give a good yield of chips of comparatively low oil content. It is easier to grow than the Netted Gems, the favorite chipping variety, and is a good yielder. Tubers are smooth and have shallow eyes, thus lending themselves readily to mechanical or steam peeling with little waste.

It has been reported that this potato can be held for a considerable period at 50 degrees without sprouting and at 40 degrees it can be held for nine months. Regarding sugar accumulation, in 42 degree storage has been found at Kentville to be fairly slow and tubers can be conditioned in removal from storage to clear the accumulation satisfactorily.

## GOAT TRADER

When Guy Craemer, implement dealer of Wakenfield, Neb., advertised he'd trade for anything—"goats or what have you"—he didn't think anyone would take him literally. However, Art Doersch, a farmer, swapped his goat for some tractor oil filters. Then Craemer traded the goat for a plane.

**Handy Hints**  
For Farm and Home

## Square Locates Center

A SIMPLE use of the steel square easily locates the center of any board. The first step is to draw a straight line across the board, using the square. Now rotate the

square, as shown in the illustration from *American Builder*, so that the readings are identical at either side where the line meets the square. The center mark will coincide with the point of the square.

## THE TILLERS

## Average moisture for stubble crop gives greater yield than from summerfallow

OTTAWA—Above average rainfall on the prairies during the past five years resulted in losses of moisture from summerfallow by stubble drainage. The roots of cereal crops penetrate to a depth of 3.5 to 4 feet

in clay and loam soils and to 5 feet in sandy soils. The maximum depth of water retained for the crop in these soils is 8 inches in heavy clay, 6.5 inches in medium loam and 5 inches in sandy loam. Any additional moisture will pass

below the root zone, and be unavailable for crop growth. Until recent years the moisture storage in summerfallow rarely approached maximum capacity and the actual percolation losses were considered unimportant.

The long-time average conservation in summerfallow at seed-time in southern Saskatchewan is about 4 inches of water. Stubble fields at seed-time hold over half as much as summerfallow or an average of 2.25 inches. The mean rainfall of 7 inches received from May to August makes up the remaining water used by the crop.

Data obtained at the Soil Research Laboratory, Canada Department of Agriculture, show that at least 5 inches of water is required before any crop is produced, and then for each additional inch of water the yield increases about 3.5 bushels per acre. The gain in yield per inch of water increases to about 4 bushels per acre when the total water used is greater than 10.5 inches. These results apply alike to stubble and summerfallow crops where weed growth is not a serious problem.

Argument in favor of crop stubble cropping even in so-called normal seasons. In wet years the losses of moisture from summerfallow by deep penetration make seeding stubble even more advisable.

There are, however, other factors that the farmer must consider. Besides storing moisture the summerfallow reduces weed growth, increases the availability of plant nutrients, and provides some assurance of a crop should the following year be dry. The weed situation has improved thanks to chemical sprays, and these may replace summerfallowing to some extent in the control of weeds.

Summerfallowing has been relatively much less important in making plant nutrients available than in moisture conservation in the drier areas of the prairie. The value of summerfallow to assure some crop each year cannot be denied.

The purpose here is to point out that summerfallowing, although necessary, is not the good conservation practice that it is sometimes believed to be. If stubble fields on loam soil are moistened to a depth of 30 inches or more at seedtime not much can be gained by summerfallowing because, given normal rainfall, some moisture is likely to move beyond the root zone by mid-July.

Through radiation and chemical tests, they have proved that the jaw belonged to a modern orangutan. The skull was a real fossil. But it had been doctored to make it look 10 times older than its actual 50,000 years. Like the skull and jaw, other animal remains found with them also had been artificially aged. All the "fossils", moreover, had come from somewhere else and been planted at Pildown.

So far, the faker of the fossils remains unofficially unidentified. But it is certain that, in making a man of a monkey, he made monkeys of men.

**Physician pilots form Association**

Latest membership figures released by the Flying Physicians Association with headquarters in Chicago indicate there are over 700 physician pilots in the United States, 61 in Canada, three in Mexico and three in Alaska. There is only one flying physician in Manitoba, that being Dr. W. Collett of Morden.

The Association, in its first formal year of organization, was formed to further the aims and progress of aviation in America.

—By Les Carroll

## Adoptions pose legal tangles

Canada is growing some of its knottiest legal tangles at a rate of 10,000-12,000 potential court cases a year—and you're involved if you or any member of your family has been or will be adopted, says Jon W. Kiernan in *The Financial Post*.

Adoption is a social phenomenon that has developed tremendously within the past two decades despite the obstacles created by the nation's 11 sometimes conflicting sets of adoption laws. Society's now-found wholeness attitude toward adoption is too far ahead of portions of the law.

The cause of current interest has been an about-face by social agencies across the nation. They have switched, within the past 20 years, from a go-slow-on-adoption policy to wholehearted support of adoptions, and as the increase in placements occurs it brings the entire legal maze into the open—and not even the lawyers like what they see.

The basic problem stems from the fact that common law does not recognize adoption. To compensate, the 10 provinces and two territories have designed a total of 11 different types of piecemeal legislation, so what may be legal in one province may not be in another.

## Variety of Business At MD Meeting

The Council of the MD of Wainwright No. 61 met in the Council Room of the MD at Wainwright on Thursday, June 14, 1956.

Councillors Dallyn, Castle, Garrioch, Patterson, Plaxton and Archibald present, also Trustee Hissett of the Wainwright School Division No. 32.

Reeve Archibald in the chair. This is the official record of the proceedings.

Dallyn—that the Minutes of May 10, 1956 be accepted as written. Cd.

### Finance

Castle—that the accounts as recommended by the Finance Committee and subsequent accounts presented be passed and paid.

Patterson—that the Reeve and Treasurer be and are hereby authorized to borrow from the Treasury Branch of the Province of Alberta the sum of \$20,000.00 deemed necessary for ordinary Municipal purposes.

### Agricultural Service Board

Plaxton—that the following weed inspectors be approved:

Lewis Fahner, Chauvin.  
A. D. Nelson, Edgerton.  
A. Gibson, Wainwright.  
Ivan Archibald, Irma.  
R. E. Congdon, Field Supervisor, Wainwright.

Archibald—that this Council approve the recommendation of the Service Board to increase the salary of Melvin Prosser, Rat Control Officer to \$2700.00 per year, as from June 1, 1956. Cd.

Patterson—that this Council act on the recommendation of the Service Board to supply seed to grass down 20 acres in NW 10-43-2-4 to create wheat to control Toad Flax (\$2.00 or \$3.00 per acre) this work to be under the control of the field supervisor. Cd.

Dallyn—that the Secretary get information re to the 3 way share of chemicals for Toad Flax control, also for the 4 bad weeds on road allowances. Cd.

Garrioch—that the oral report of the Field Supervisor be accepted as given, May 12 to June 9. Cd.

### Municipal Property

Bylaw 530, concerning the sale of the NW 25 and SE 36-45-4-4 to J. A. Taylor of Pabian for \$4620.00 presented, passed first, second and third reading.

Bylaw 531, authorizing the purchase and yearly rental of lands for roadway and recreational grounds for a certain sum of money from H. C. Mockford NE 2-44-5-4 presented.

It was moved that Bylaw 531 pass its first, second and third reading.

Garrioch—that the Agreement between this MD and H. C. Mockford re to land for roadway and recreational lease be approved in principle and that the Reeve and Sec-Treas. be authorized to sign the said agreement. Cd.

Patterson—that this Council raise no objection to the Dept. of Highways leasing the road allowance to the Buffalo Park Grazing Association within the area of the said Association. Cd.

Castle—that the SW 16-43-6-4 and the SW 20-43-6-4 be deleted from Motion 184, May 10, 1956. Cd.

Bylaw 532, concerning the leasing of certain lands for grazing purposes presented, passed first, second and third reading.

Patterson—that the report of the Field Supervisor re to fallowed area SW 16-43-2-4 be accepted and that Robert B. Tinnard be paid the rate of \$2.00 per acre for 42 acres so fallowed in 1955. Cd.

### Public Works

Correspondence read from Mrs. Don Gordon alleged car accident. No action taken.

Patterson—that Clr. Castle and Garrioch be a Committee with power to act re roadway N. Leskow NE 36-44-4. Cd.

Mr. Bert Kitchen interviewed Council re to flood conditions SE 12-46-4-4 and roadway diversion west side of slough on road allowance west side of said SE 12-46-6. This matter referred to Clr. Plaxton.

Directors of Line 3 Farmers Mutual Telephone Co. interviewed Council re to building line from the Village of Irma east and north as the phone lines must be set 51 feet from the centre line of this district highway the compensation for removal and re building of fences on back sloped roads was a contentious matter.

Archibald—that motion 141 April 3, be rescinded. Cd.

Castle—that the total amount of compensation to be paid to the occupant of land where road widening is to be done shall be up to and not exceed \$80.00 per mile. Cd.

Correspondence from Mrs. Marie Tebbis re roadway read. No action taken.

Correspondence from and to H. N. Glenn 5 1/2 of the SW 7-43-1-4 roadway compensation referred to Clr. Dallyn and report at July meeting.

Archibald—that this Council approve the actions of the Public Works committee meeting held May 18 re to allocations of Public Works road Grant 1956.

Plaxton—that a copy of 1956-57 Provincial Government rental rates of Machinery where same concerns this Council be made for each Clr. and Works Foreman. Cd.

Correspondence from the N.W. Utilities Ltd., private grant up to \$1500.00 road building in 47-9-4 read and noted.

Correspondence from J. Harvey Robinson compensation for travel damage SE 3-46-5 tabled.

Secretary was instructed to advise the Alberta Govt. Telephones that construction work under special contingencies will start at the south boundary of the MD in Range 1.

Garrioch—that J. M. King stock pile crushed gravel at 10c per yard plus 75c per yard for crushing minimum 5000 cubic yards in the SW 28-47-7-4. Cd.

The matter of road diversion NE 36-44-7-4 Wainwright Refining Co. left with the Secretary.

Several representatives of Machinery Companies interviewed the Council asking if the Councillors would attend arranged demonstrations, Union Tractor at Edmonton end of June, Construction Equipment at La-Road Machinery re demonstration during July, Richardson held June 11, any machinery purchased considered indefinite.

Plaxton—that the pay sheets be passed and paid.

No more business before the meeting.

Garrioch—adjourn. Cd.

## NOTICE TO RATEPAYERS AND OCCUPANTS OF LANDS

### Municipal District of Wainwright No. 61

The Council of the Municipal District publish the following 2 Sections of "The Noxious Weeds Act" being chapter 82 R S of A as amended.

Section 2 ss(h) "land" means and includes not only all lands owned or occupied or controlled by any person, but for the purposes of this Act, also means and includes the land up to the centre line of all contiguous roads or road allowances, highways, streets or lanes or streams, or the low water mark of any lakes or bodies of water included within the said lands.

Section 17 Every person who is the owner of any parcel of land, and every person who has any beneficial interest in any parcel of land, and every Lessee, Tenant or occupant of any parcel of land shall prevent any noxious weeds from growing upon such parcel of land, and shall comply with all the provisions of this Act for the destruction thereof.

CHAS. WILBRAHAM, Secretary-Treasurer.

### "PARLIAMENTARY AND THE PIPE LINE"

(Continued from June 20)

The debate on the Pipe Line Bill lasted sixteen sitting days of Parliament in all.

In those sixteen days, one Member of the C.C.F. and one Member of the Conservative party, spoke more than thirty times.

Two other Conservatives spoke more than twenty times each, and another Member of the C.C.F. more than fifteen times.

It is true that most of these speeches were on procedure not on the pipe line.

But that was not the fault of the Government.

And yet these gentlemen who made all these speeches would have you believe that they were gagged, that they had no opportunity to debate this measure, and that they had no chance to get information about it.

The simple truth, as any one can discover who will read Hansard for himself, is that there was ample opportunity for the Members of the Opposition to get information on any phase of this project if they had wished to make use of the time available for that purpose.

It is hard, therefore, not to draw the conclusion that the Opposition parties felt they could impress you more by pretending they were not allowed to debate, than by using these sixteen days to give serious consideration to this important national project.

I am not going to say very much about the action taken by the Leader of the Opposition, Mr. George Drew in attacking the Deputy Speaker and in moving in Parliament that the House no longer had confidence in its Speaker.

No one who understands our British Parliamentary system would question the right of the Opposition or the duty of the Opposition, to oppose the Government and introduce motions to embarrass the Government and to express lack of confidence in the Government.

That is the right of an Opposition. Indeed, the Opposition has a duty to try to defeat the Government.

But it is one thing to attack the Government and a very different thing to attack the presiding officers who represent the authority of Parliament itself.

The Members of the Opposition who supported Mr. Drew in attacking the Speaker admitted that before the pipe line debate began, he had been a good Speaker, some of them said the best Speaker the Canadian Parliament had ever had.

Yet, they felt they were justified in attacking a respected officer of Parliament and seeking to destroy his reputation.

I cannot believe the people of Canada will easily forget or easily forgive conduct of that kind, conduct which, if persisted in, would destroy the institution of Parliament itself.

Because the Opposition made the utmost use of the rules to prevent the Bill from passing, we had no choice but to use the rules to get a vote of the Bill to give all the Members of Parliament a chance to decide whether or not it should pass.

That was all we were seeking to do and that is surely something that a Government with a majority supporting it has a right to do.

And it is my conviction that when the smoke has cleared away from the scene and we can view this pipe line debate in perspective, several things will stand out:

The natural gas in Alberta belongs to those who discovered it in that Province. Its use is subject to the laws of that Province. The Government of Alberta naturally wishes to use the gas, both within the Province to expand industry, and by exporting it for sale. The Federal Government is also interested in the expansion of industry because every new industry will, if profitable, provide us with substantial tax income which may permit greater expenditures for the welfare of our people or reduced taxation, as well as additional employment.

The Government of Manitoba was anxious to get the gas delivered in that province, as Winnipeg could use it at this very moment.

In the East, the Premier of the Province of Ontario and his government insist that energy would be urgently needed in Ontario by the time this gas could be delivered, and that no delay should be permitted.

In due course, the Trans-Canada Pipe Line Company will offer in Canada 51 per cent of its voting stock. This means that Canadians will be entitled to share in the profits and the risks of this venture if they so desire. Under our pipe line legislation of 1951 a majority of the directors of a pipe line company must be Canadians. Accordingly a majority of the directors of this company are Canadians. So, if Canadians purchased this stock it could be owned as well as managed by Canadians.

Under these circumstances the sooner the job was started the better. The time has gone by when Canada can afford to wait; the future belongs to us and any government which hesitates to take steps to keep our expansion growing would not be doing its duty to the Canadian people.

Of several of the American corporations organized the Standard Oil Company in 1914 and was President and Director until 1955. Mr. Fravel is also a Director of Standard Oil Company.

Oshawa—Automobile sales in Canada are continuing at their predicted rate, and General Motors of Canada is still working overtime to produce sufficient cars to meet current demand. W. A. Wecker, president of GM, said yesterday.

"Retail sales of automobiles in Canada during 1955 were more than 8 per cent higher than during the same period in 1954," Mr. Wecker said.

"As for GM, we have been working overtime ever since we reached full production and will be working overtime for some weeks to come to fill present orders. The Canadian market for passenger cars seems to be a little stronger than in the United States," Mr. Wecker said. "However, we base GM production in Canada on the outlook for the Canadian economy as a whole. Our economy is strong today and should continue strengthening under present conditions."

**CHILD RESTS AFTER MOUNTAIN ORDEAL**—Seven-year-old Marsh Dixon, of Brownsburg, Ind., rests at home after being lost 19 hours in the mountains west of Denver. She was scratched by tree branches and very hungry but otherwise unharmed. She is comforted by her mother.

## Predict extraction of food, fuel from worthless waste

A team of scientists has peered into the future and come to the conclusion that within 50 to 100 years the demand for food, minerals and energy will be so great it will take every ounce of available power to provide it.

By the year 2000 they believe man will be extracting fuel from common rocks and food from wheat stalks, roots, and plant life that today is discarded as worthless.

But they are convinced there is almost no limit to the amount of food and minerals obtainable if man has the brains and energy to get it from difficult sources.

Their conclusion was reached in an exhaustive study by scientists at California Institute of Technology in co-operation with the management of leading American corporations.

"Industry's response to the study has been thoughtful and enthusiastic," said Dr. R. W. Cairns, director of research for a powder company.

"The report revealed our complete dependence on the manpower resources of our scientists and engineers to meet the imposing challenge of growing population and skyrocketing natural resources," he added.

H. S. M. Burns, president of an all company said, "I found the report on minerals, meals and men not only intensely interesting but very thought-provoking."

Dr. John Weir, who directed the study of future manpower needs for Caltech, reported that by the year 2000 one scientist or engineer will be required for each 30 persons if Americans are to survive on the level to which they will be accustomed by then.

## Heart beat often restored after death

Bringing the dead to life even outside the operating room is no longer impossible, according to a report in the Journal of the American Medical Association, received by the Health League of Canada.

Restoration of heart beat after sudden death has been achieved frequently during surgery, and the emergency measures used are almost routine in the operating room. However, the authors report one of the first known cases of resuscitation of a patient who died outside the operating room.

"The death factor in coronary artery disease is often small and reversible—the heart wants to beat and often it needs only a second chance," they say.

This second chance must be given immediately—almost within seconds—by persons trained in emergency resuscitation. "It is not impossible that someday properly trained and equipped teams may extend the use of emergency treatment outside the hospital," they say.

The man was dead. Their patient, a 65-year-old physician, had suffered heart distress, and early symptoms of myocardial infarction were shown by electrocardiogram taken just before he collapsed. He was rushed to the operating room, where it was found that the heart had definitely stopped beating. "The man was dead," the authors report.

Within two minutes artificial respiration and oxygen administration were begun, followed by hand massage of the heart and electric shock.

Exactly one half hour after he collapsed, his heart started beating by itself. Six days later he was discharged from the hospital. He has now returned to practice.

Throughout the half-hour, oxygen circulation in the brain was maintained by artificial methods, to prevent the cell damage which results if the brain is deprived of oxygen for longer than four minutes. The only adverse effect experienced by the patient was that he had no memory of the 36 hours immediately following the attack.

The authors are from the department of surgery of Western Reserve University and University Hospitals, Cleveland.

## Modern package designs induce housewives' trance-like buying

Well, a noted designer says it is because she was in "a mild hypnotic trance induced by mass displays, lights, signs, slogans, pictures and brilliant colors."

Gerald Stahl, a leading package designer, says this "trance-like" buying is one of the things that helps to keep the complex economy boiling.

"Not only does unplanned buying keep consumer demand strong and growing," Stahl adds, "but it also produces faster acceptance for new products." Stahl quickly points out that under this semi-hypnotic state the housewife just doesn't buy anything she trips over. "The product practically has to jump out and bite her!"

Supersmarket trance. "Recent studies have clearly established that the average shopper in a state of super-market trance has a very much lowered response rate and level of awareness. Even the rate of pulse and breathing are likely to be lower."

"As a result," Stahl notes, "a product has to be almost able to talk or slap the shopper on the shoulder to gain attention."

Stahl says since the robot package hasn't been developed yet, the next best thing is to package the product in such a way as to create "emotional stimulation."

Stahl, who has done package design work for scores of big companies, says emotional stimulation is built into a package by the proper use of color and design.

Eye attraction. "Modern package designers have many scientific tools to guide them," he points out. Laboratory equipment capable of precise measurement of eye impact, eye attraction and eye retention is in wide use.

Industry in the U.S., awake of the vast market opened up by impulse buying, is spending between \$10 billion and \$12 billion a year for packaging, almost double the total of a decade ago, Stahl

## Malaya replants old rubber trees to meet demand

Replanting old rubber trees with new high-yielding varieties is considered the only answer to Malaya's problems of increasing demand, high production costs and competition from synthetic, the Canadian Trade Commissioner in Singapore writes in Foreign Trade.

Average production from trees planted up in 1940 is less than 400 pounds per acre per year; new types available since the war will produce up to 1,500 pounds per acre.

One-third of the two million acres of estate rubber has been replanted, with the estates themselves meeting the cost.

However, since the middle of 1955 they have been helped by a grant of \$400 per acre (or about half the total cost) for every acre replanted in the next seven years, up to a maximum of 21 percent of each estate's planted acreage. Some of the more efficient estates have already exceeded this percentage.

### MAKE YOUR OWN

### Portable freezer for picnics and trips

The ten-gallon keg shown in the sketch will hold enough ice cubes and frozen foods for a big family picnic. It is insulated with rock wool and decorated in gay colors. This keg is one of several useful gadgets you can make for the picnic from a pattern. A unique napkin holder with anchor jig-

saved from fine wood. A food screen that will keep out the insects. A hurricane candle holder to fit any lamp or lantern chimney. Then there are many decorative designs from tiny scrolls to the large chandeliers on the barrel. These designs are just traced on to the wood and the colors filled in. Everything is on pattern 447 which is available to readers who will send 35c with name and address.

**FREE CATALOGUE** upon request Address order to: Home Workshop Patterns, Department F.P.L., 4455 West 5th Avenue, Vancouver, B.C.

### WEEKLY BIBLE COMMENT

### CHURCH GREW FROM EXPERIENCE OF NEW LIFE

The Christian Church did not arise out of plans of some promotional organizer. There was no advance prospectus or blueprint of a proposed organization. The Church definitely grew out of an experience. It was not a matter of organization awaiting or developing life; it was life leading to organization.

Although Jesus did not formally organize the Church, there was more organization associated with his ministry than is commonly supposed. He gathered about Him the apostles, to whom were committed special privileges and responsibilities, and with whom He communed concerning the deep things of the Kingdom, so that he developed a sense of disciples—a sort of Christian cabinet—to carry on His work. Also, He organized the "seventy" who went through the villages teaching and preaching, two by two.

The Church, as we have said, had its origin in the experience of the new life. It began as these experienced expression in the remarkable events on the Day of Pentecost. Here, as the disciples were gathered together, in one place, there came a strange outpouring of spiritual power. Peter, who formerly had denied his Lord, preached with great boldness and courage about the reality of the Christian way, and brought home to the hearts and consciences of his hearers the realization of their sins. The result was that many were brought into the Christian way.

In his letter to the Ephesians, Paul sets before us a noble ideal, that of the Church as a body incorporating the spirit of Christ.

The Church is still waiting for the fulfillment of that ideal, and the world itself will never find peace until the unity in love becomes the dominant mark of human society.

**CITY DWELLERS SAFER** City dwellers are in less danger of lightning than rural people, building act as lightning conductors.

60 Front Street W., Toronto.

Be sure to write plainly your Name, Address and Pattern Number.

## Astonishing changes in travel predicted in the next 20 years

An astonishing view of what it may be like to travel on the railroad in 1975, is contained in a United States Chamber of Commerce film "People, Products and Progress in 1975". The film gives a preview of what life in America may be like in 1975.

Among descriptions of atomically-powered automobiles, chemical heating units that cook foods right in their packages, automatic "eyes" that close windows when it rains, "thin" TV sets that hang on the wall like pictures... the film depicts some of the startling changes that may occur in the railroad industry.

The railroad industry, faced with the challenge of the most travelling public in the world, will have provided several new types of articulated passenger trains, characterized by lighter weight plus an ability to negotiate curves at greater speeds. Some of these trains may be pulled by atomically-powered locomotives. The Atomic Energy Commission already has approved the proposal of at least one railroad company to explore this possibility.

Inside the new trains will be floating chairs, hivesway tables and adjustable partitions to create a semi-private compartment for your own party. Hidden conveyor tubes will bring food and drinks... and conveyor aisles may help passengers go from one car to another.

The commuter train of the future will be domed and double-decked.

By Foxo Reardon

Police searching for several items stolen at Mount Carmel, Illinois, are wondering what the thief wanted with them. Stolen were four stop signs from four different street intersections; the flag from the sixth green at the golf course and a sweater from a parked car.

## J. C. McFarland Co.

### THERE'S MORE VALUE FOR YOU IN MODERN MECHANIZATION

Stepped-up and intensified programs in the engineering divisions of implement firms are producing a great variety of machines that offer more and more value to the users.

Today's machines look better and they do better work. In them you get higher quality materials to operate at higher speeds and give longer service. You get design that provides for the comfort and efficiency of the operator.

Today's machines are equipped to cut-down lubricating chores and to give quick and easy coupling and uncoupling. They offer a wide range of speeds to suit the work and the conditions and they have more capacity to do your work quickly and economically.

See your local dealer about the machines in the 1956 Massey-Harris and Ferguson lines, machines that offer more value in modern mechanization.

### Local News

Lieut. Col. and Mrs. Greenberg of Edmonton spent the holiday week-end here as guests of Mr. and Mrs. R. C. McFarland. Linda Daniels is holidaying at Vancouver.

Mr. and Mrs. Steve Jones have been visiting here with the P.E. Jones and C. P. Jones families.

Mrs. Peter Lucas and small son are visiting here with Mrs. Ostad and Sharon.

Mrs. F. J. Lang visited with her daughter in Edmonton last week-end.

Mr. and Mrs. M. MacMillan of Edmonton have spent a few days here at the home of their son Neil.

Mr. and Mrs. R. L. Simmermon are enjoying a two weeks holiday at Clear Lake.

Mr. and Mrs. A. Ronaghan and girls are holidaying with relatives at Islay.

Mrs. M. M. Tripp is home again after visiting for several weeks at Hanna at the home of her niece Mrs. Mills.

A donation to the Salvation Army in memory of the late Mrs. S. Thompson was made by Mr. and Mrs. Jas. Craig, and one to the United church from Mr. and Mrs. W. Inkin.

Connie Owen has found employment for the summer months at Viking hospital. Marjorie Matthews and Nellie Cairns will be at Wainwright hospital for the summer.

Quite a number of folk of Irma district are helping out at the Wainwright camp during the rush season.

Mr. Cole of White Rock, B.C. has been visiting here at the home of his daughter, Mrs. Gar Coulman. Mr. Cole, who is a former Irma resident, celebrated his 80th birthday here last week.

Mrs. E. Rae has just returned from a weeks holiday in the city where she visited her son Alan.

The Afternoon Group of the W.A. will meet at the home of Mr. and Mrs. Eldon Fenton on July 12. Don't forget the Sale of Home Cooking at the Irma Food Market on Saturday, July 14 at 3 p.m.

Congratulations to Isabel Ingalls, Sheila Ballentine and Margaret Orzechski who made good marks on the recent Toronto Conservatory of Music exams held at Wainwright.

Mr. and Mrs. Roy Latner of Kitchener, Ont., have been renewing old acquaintances in Irma this week.

Mr. and Mrs. F. Jack Elaine and Arthur spent the holiday week-end at Alberta Beach.

Mr. John Meyer had the misfortune to break his arm in a car accident on Monday and has been in hospital.

Mr. and Mrs. Larry Meier and family visited with relatives at Lundan, Sask., over the long week-end.

Irma folk were glad to see Mr. and Mrs. Leo Shaw back at Irma for a few days. Leo is able to get about quite well on crutches and expects to make a good recovery.

Our former Easterly Echoes scribe, Mrs. H. Morse, has gone with her husband and family to Flaxcombe, Sask. We would like to thank her for her good work.

Mrs. Bob Dempsey has kindly consented to keep those Echoes echoing from the east—so anyone having news in her district please pass the word along to her.

Attending United Church boys camp this week at Hardisty are Jack Atkinson, Ian Inglis and Douglas Daniel. These lads should not be lonely for there are 65 boys enrolled there.

Mrs. L. A. Hager of Devon is leaving on July 14 for a holiday trip to Nova Scotia.

Our Irma band is now an established part of community life and has been most favorably received at the North Irma Picnic, Roseberry Picnic and at the Mannville sports on July 2. We can hardly wait to see it leading the parade on Irma Day, August 6.

The evening W.A. is having a bake sale at the Irma Food Market on July 7 from 3 to 5 p.m.

Miss Jane Churchill and Mr. and Mrs. Lee and family of Edmonton visited on Sunday with Mr. and Mrs. E. W. Prosser and family.

### Echo-Rodino

(Last Week)

Yvonne Blanchard of Irma has been visiting the Beckett children.

The old-timers claim there is no country like the hills. It's one fact that there is always plenty of something, be it sunshine or rain. This district was drenched with another good soaker less than a week following the first rain of the season.

The Benefit dance had to be called off due to the rain but will be set on a new date.

Mr. and Mrs. Norman Hollar celebrated their third anniversary on Sunday.

Mr. and Mrs. Victor Martin and girls took in Saturday at Wainwright stampede.

(This Week)

Mr. Ernest Hollar is having a water well put down by Tom Woods.

Glenn Hollar is in the process of moving his house to a new location where there will be more shelter and a better approach to the highway.

On the afternoon of June 28 we experienced a fair cloud-burst with a sprinkling of hail. Roads and grades which were under water in the spring break-up are again covered over with water.

Mr. and Mrs. Walter Faulkner of Edmonton visited friends in the district on Thursday.

The youngsters are again enjoying a vacation. The last day of school was very wet so the planned picnic at Albert turned into indoor games. In the evening the Junior High sponsored a dance and was enjoyed by all who attended.

Marvin Crouse had the honor of receiving an award for perfect attendance during the term.

### Chrysler Corporation Increase Sales

WINDSOR, June 30—For the first five months of the current year, sales of Chrysler of Canada automobiles have increased by 11.3 percent over one year ago, it was announced here today.

The company's gain compares
